REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: The combination of features in the independent claims (47 and 53) has not been found in the prior art. The prior art comprises multiple port register file or memory register storage device organized into plural portions that is accessed (read or write) in parallel by execution units and priority between execution units for access to the memory. However the additional combination (in claim 47) was not found in the prior art as follows: a port priority control logic for resolving a write conflict occurring when the first execution unit attempts to write to both the first portion and the second portion and the second execution unit attempts to write to the second portion the port priority control logic allowing the first execution unit to write to the first portion, the port priority control logic allowing the first execution unit to write to the second portion if the execution unit has a higher priority than the second execution unit, the port priority control logic allowing the second execution unit to write to the second portion if the second execution unit has a higher priority than the first execution unit. The variation to this combination in claim 53 where the steps in claim 47 detailed above are claimed but the priority logic is not specified was also not found in the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
